Short BIO

Six months ago, I decided to change my life and programming became one of my main interests. I started learning Python on stepik.org and realized that I really like it and I want to make progress in this sphere. I signed up for a Python-developer course, watched a lot of videos on YouTube, read some books and improved my skills in coding. Now, I'm ready to do my best to make me and company I'm working better.

Education

Brunoyam

"Python developer"

01.2023

Here I create my first Django website, got acquainted with different libraries, learned what parsing is, understood how algorithms work. I also learned about databases and the systems that work with them. I studied unit and manual testing.

Stepik.org

"Python: course for beginners"

10.2022

I learned the base of Python-language.

IT-Academy

"Project Management"

06.2022

I learned what Agile is and such methodologies of project management as Scrum, Kanban, Waterfall, Extreme Programming, Nexus, etc. I can create Project Charter, Gantt Chart and other documents (for instance, Communication Matrix, Responsibility Assignment matrix). I also learned about useful services as Jira, Trello that helps you to manage your project better. And, of course, after this course I try to develop soft skills that true leader required.

Experience

Teacher of English

08.2021 - 06.2023

Here I picked up such useful and significant soft skills as communication, time-management, creativity, responsibility and mentoring

Skills

- ✓ Django 3.0
- ✓ SQL
